

Get On the Information Superhighway: Join the First-Ever Electronic Institute Sponsored by Loyola Marymount University May 15 - August 3

Loyola Marymount University is proud to have served over 5,000 high school forensics students through a program of traditional on-site institutes. During our 27 years of sponsoring such programs, we have become convinced of the value of intensive debate education in a variety of formats.

In 1996, LMU is pleased to offer an exclusively computer-based, distant learning project through the LMU DebateNet in addition to our other institutes.

The LMU DebateNet Distant Learning Project's key features are:

- Topic and theory lectures by nationally-recognized debate teachers electronically transmitted on the DebateNet
- "Cyberlabs" will be conducted at various times during the day to accommodate debaters' work schedules in various time zones
- Electronic debates conducted in real time or lagged time through the Internet
- Evidence briefs, cases, and critiques distributed electronically to participants
- Coordinated student research projects with electronic pooling of all research products
- Opportunity to earn 3 units of advance placement college credit
- Students or schools can join at any time and receive full access to lectures and research

INTERESTED IN TAKING A GIANT STEP
INTO THE FUTURE OF DEBATE?

BE A PART OF A QUARTER CENTURY OF FORENSICS TRADITION

Top Ten Reasons Why Over 5,000 Students Have Attended LMU Institutes

- Fair price for a good value: Only \$895 for tuition, 3 meals a day, room with private bath, and 3 units advance placement college credit.
- Opportunity to earn college credit.
- Access to over 5000 evidenced briefs created at LMU and earlier institutes.
- A beautiful, safe, park-like campus situated on a bluff overlooking the Pacific Ocean and the Los Angeles basin.
- The opportunity to work with national champions and coaches.
- A learning environment balancing challenge and support.
- Learning by observing national champions.
- Learning by interacting with students from throughout the United States.
- A balanced program, with recreational opportunities including institute trips to Disneyland, Hollywood, and California's best beaches.
- Small workshops and high levels of personal attention with coaches.

All traditional institute students will have access to our Electronic Institute, an Internet source of chat rooms, research, lectures and labs, from May 15 to August 3 at no additional charge.

If you want a great place to work, a long and excellent tradition, and a balanced program — call or write for an application today!

July 21 - August 3, 1996
